Over the past period, large-scale work has been carried out on the establishment of an effective system of preschool education aimed at healthy and comprehensively mature growth of the growing generation in our country, the introduction of effective forms and methods of education and education in the educational process. The favorable conditions created for the development of public-private partnerships in the field of preschool education have become a solid foundation for further increasing the number of non-state preschool institutions and expanding the range of services they provide. At the same time, the analysis carried out shows the need to ensure the coverage of children with preschool education, fill preschool educational institutions with modern educational and methodological materials and fiction, and solve the issues of attracting qualified pedagogical and managerial personnel to the field.

A plan of measures for the implementation of the tasks set out in the program for 2017-2021 on further improvement of the preschool education system was developed.

At the present stage of development of the educational system, rapid changes are taking place in preschool education, which is considered its first link, and they are manifested in the following.

- *preschool educational institutions are moving to new types of financial and economic activities;*
- *the network of non-state preschool institutions is expanding; advanced educational technologies are being introduced;*
- *improving the system of staff training;*
- *on the basis of short-term groups, alternative forms of preschool educational institutions are being introduced.*

Preschool education should perform the following tasks, regardless of its forms and methods:

- *strengthening the physical and psychic health of children;*
- *involvement of children in national, universal, ancient and cultural values;*
- *development of the mental, intellectual potential of the child;*
- *formation of high moral and spiritual qualities on the basis of national traditions and achievements;*
- *preparation of children for education in school systematically and purposefully, development of their individual characteristics and talents.*

The above testifies that the preschool education system in the Republic of Uzbekistan should ensure the comprehensive development of the child according to the requirements of the state and society, taking into account the individual characteristics.

The feature of preschool age is that it is during this period that general development is ensured, as a result of which the foundation is laid for the acquisition of various manifestations of any social knowledge, skills, skills and activities in the future.

The prospects for improving the preschool education system are important for the future of Uzbekistan. Efforts to improve this system are aimed at strengthening the foundation of tomorrow.

Below are the main prospects and directions for improving the preschool education system:

1. Expand coverage and increase capacity:

* Development of public-private partnerships: opening new preschool institutions and modernization of existing ones by strengthening cooperation between the public and private sectors. This will help expand coverage, especially in remote and rural areas.

- Development of family preschool: expanding and supporting family preschool forms (e.g. "smart home", "family kindergarten"), taking into account the benefits of raising children in a family environment.

* Development of inclusive education: creating an inclusive environment in preschool institutions for children with disabilities, ensuring their equal education.

2. Improving the quality of Education:

* Increase the capacity of pedagogical personnel: improve the skills of Educators of preschool educational institutions, familiarize them with modern teaching methods and technologies, increase their motivation.

* Improving educational and methodological support: providing modern educational programs, manuals and materials, developing them taking into account the age and individual characteristics of children.

- Introduction of STEAM education: integration of STEAM educational elements into the preschool process to arouse and promote children's interest in the fields of science, technology, engineering, art and mathematics.

- The establishment of early development centers: the establishment of special Centers for the support of early development of children, the identification and development of their abilities.

3. Wellness and safety:

- Organization of a healthy diet: to ensure a balanced and proper diet for children, to take measures aimed at strengthening their health.

- Improve medical care: regularly monitor the health of children, carry out preventive measures and provide the necessary medical care.

- Ensuring safety: ensuring safety in preschool institutions, compliance with fire safety regulations, taking measures aimed at protecting the life and health of children.

4. Digitalization and innovation introduction:

- * Improving the electronic queue system: creating a transparent and convenient electronic system for the admission of children to preschool institutions.

- * Integration of Information Systems: the creation of a unified information system for the management, monitoring and analysis of the activities of preschool educational institutions.

- The use of interactive educational resources: the use of interactive educational resources, games and applications to arouse the interest of children and facilitate their education.

5. Local feature accounting:

- Development of regional programs: development of programs for the development of preschool education, taking into account the demographic, economic and cultural characteristics of each territory.

- * Promotion of national values: promotion of national values, traditions and culture of the people of Uzbekistan in the process of preschool education.

The implementation of these prospects plays an important role in further improving the preschool education system, ensuring the comprehensive development of children and raising the future generation.
